INTRODUCTION

During the 2019 legislative session, the Rhode Island legislature authorized a new round of standards review ([RIGL 16-22-30](#)). Based on this legislative directive, the Rhode Island Department of Education (RIDE) initiated a series of steps in the fall of 2019 that began with the formation of the Rhode Island History and Social Studies Advisory Committee (RIHSSAC). The RIHSSAC is a group of Rhode Island educators from the K-12 and postsecondary systems. It includes representation from various community, civic, and historical organizations and continues to meet.

In 2019, the first task of the RIHSSAC was to review the existing RI Social Studies Grade-Span Expectations (GSEs) against the criteria set by the legislature and to recommend to RIDE whether the GSEs be kept, revised, or replaced. To fulfill this task, starting in late summer of 2020, the RIHSSAC developed an interactive process to engage diverse communities throughout Rhode Island to provide input on the skills, content, and equity focus for the new standards, and to offer feedback on other content for inclusion in the curriculum frameworks. Participants providing input were encouraged to do so via a survey that RIDE developed. This process included proactively reaching out to individuals, organizations, associations, and groups representative of Rhode Island's ethnic, cultural, linguistic, and identity-based communities. This process was purposeful and included historically silenced or erased communities. In addition, the intent was to develop an active feedback process that engaged communities rather than a more traditional and passive approach to soliciting feedback. Thus, as part of this process, communities had options to participate in virtual feedback sessions using a presentation and survey provided, as well as to share the survey itself with their own memberships.

During this engagement process, the RIHSSAC received over 900 survey responses from communities, organizations, and individuals across Rhode Island, which were analyzed and summarized in a report provided to the RIHSSAC. Based on this activity, the RIHSSAC found that, although the GSEs met all the criteria to some extent, significant revisions were needed. In particular, the advisory committee recommended that the revised standards decrease the total number of standards, emphasize depth over breadth, and be more culturally responsive.

In the fall of 2021, RIDE convened a sub-committee of the RIHSSAC to begin developing a draft of revised social studies standards. These standards were designed to be fewer in number and to repeat at each grade level. They were also designed to be culturally responsive. To achieve this, the revised standards were designed to emphasize inquiry-based skills essential to helping students learn a wide range of social studies content. These standards were also designed to be part of a more comprehensive social studies curriculum framework that would provide scope and sequences of content from kindergarten through high school.

The development team completed a draft set of standards in the spring of 2022. Once these standards were completed, RIDE began the task of developing scope and sequences of social studies content for each grade level from kindergarten through middle school and for five courses in high school. In the fall of 2022, initial drafts of the scope and sequences were completed.

Once there were complete drafts of the standards and scope and sequences of content, RIDE began to share the drafts with and solicit feedback from a wide range of stakeholder groups through in-person and virtual sessions. A variety of stakeholder groups were consulted throughout the course of reviewing the standards and the scope and sequences of content. This included the following:

- The Rhode Island History and Social Studies Advisory Committee (RIHSSAC)
- Classroom educators
- RI Civic Learning Coalition
- Holocaust and Genocide Education Commission
- Civics Task Force
- Commissioner's Student Advisory Group
- RI Civic Learning Coalition - Youth Ambassadors
- Rhode Island Historical Society Teen Advisory Board
- General public

As part of this feedback process, a variety of revisions were made. One substantive revision was to reorganize the standards and scope and sequences into anchor standards and content standards respectively. Next, the complete draft of the revised Rhode Island Social Studies standards was available for public review and input from November 21, 2022, to December 19, 2022. The standards were posted on the RIDE website and a feedback form was provided for stakeholders to share their feedback.

Based on the feedback provided by stakeholders and the public input, RIDE made numerous revisions and changes. As mentioned above, it is important to know that these standards are designed to be a component of the Social Studies Curriculum Framework that is yet to be developed. Included with the standards below is additional guidance on how to read and understand how the anchor standards and content standards work together to be the Rhode Island Social Studies Standards. Additional guidance documents will be developed to support districts and teachers in implementing the Rhode Island Social Studies Standards.

What is provided in this document is the culmination of all of this work: The complete set of Rhode Island Social Studies Anchor Standards and Content Standards.

RHODE ISLAND'S SOCIAL STUDIES ANCHOR STANDARDS

OVERVIEW

The Rhode Island Social Studies Anchor Standards, which are displayed on the following pages, are intended to support the principle of depth over breadth by providing a consistent throughline from kindergarten through high school. To meet this objective, there are twelve anchor standards. These twelve standards are divided into four domains: Civics and Government, History, Geography, and Economics. These anchor standards apply across all grade levels and high school courses and are designed to inform teaching of all social studies content as identified in the content standards. The image below displays the four domains and the title of the three standards within each.

EMPHASIZING DEPTH OVER BREADTH

Each of the twelve anchor standards has a consistent four-part hierarchy of cognitive skills designed to support a consistent approach to inquiry of social studies content. This hierarchy is applied to all anchor standards and content standards and is denoted through the consistent use of four verbs: *Identify*, *Explain*, *Analyze*, and *Argue*. This four-part hierarchy supports depth over breadth by providing a consistent and predictable approach to understanding complexity and rigor that benefits both teachers and students. Below is a brief description and definition of each level of rigor.

1. **Identify:** When the verb *identify* is used, students learn key concepts and ideas, such as knowledge of people and events, the ability to identify locations on a map, and the like.
2. **Explain:** When the verb *explain* is used, students understand how key ideas relate to each other conceptually. For example, this could include explaining the roles people fulfill, how things work, and the sequence or course of events.
3. **Analyze:** When the verb *analyze* is used, students examine how key concepts operate in real contexts. This can include understanding of differences and similarities, to make

comparisons, and to communicate more complex relationships, and how they play out in real life. Being able to analyze also implies being able to evaluate evidence from primary and secondary sources, as well assessing complexity through multiple perspectives.

4. **Argue:** When the verb *argue* is used, students make logical, evidence-based assertions, and consider and rebut opposing arguments. Embedded within this understanding is the ability to analyze history and make evidence-based arguments that examine the impact of ideas and actions, unpack policy decisions, and support advocacy and innovative improvements to society and the world. It is important to mention here an explicit connection to Rhode Island's English Language Arts standards. In Kindergarten through 5th Grade, students focus on developing and supporting opinions by presenting one point of view supported by reasons and information from sources or personal experiences. In grades 6 through 12, students craft arguments, presenting multiple perspectives supported by evidence from sources. However, the macrostructure of both opinion and argument are the same: students share their thinking with reasons - including examples and evidence. Argue is used throughout the K-12 standards to ensure the development of these critical thinking skills.

EMPHASIZING CULTURAL RESPONSIVENESS

As mentioned in the introduction, the Rhode Island Social Studies Standards are also designed to inform a culturally responsive and inquiry-based approach to Social Studies teaching and learning. One of the key criteria in the RIGL 16-22-30 legislation stipulates that academic standards and curriculum frameworks will “instill respect for the cultural, ethnic, and racial diversity of this state, and for the contributions made by diverse cultural, ethnic, and racial groups to the life of this state.” Moreover, standards and curriculum guidance documents must “be designed to avoid perpetuating gender, cultural, ethnic, or racial stereotypes.” To that end, the Rhode Island Social Studies Standards were written to meet these requirements.

Prior to engaging in the revision of Rhode Island's social studies standards, RIDE had developed multiple tools to support the adoption, creation, and utilization of high-quality curriculum materials, characterized by their cultural responsiveness. To stay consistent with this work, RIDE identified four CRSE design principles that were used to inform the development of the anchor standards and content standards. Below is a brief description of each principle:

Diverse Identities: The Rhode Island Social Studies Standards are intended to 1) validate and affirm individuals' diverse and intersectional identities, where the term *intersectional* refers to the interconnected nature of social categorizations such as race, class, gender, ability, religion, etc. as they apply to a given individual or group, and regarded as creating overlapping and interdependent systems of discrimination or disadvantage¹, 2) elevate the voices and perspectives of traditionally excluded groups while ensuring the funds of knowledge and cultural capital of students, families,

and their communities are central to the learning process² and 3) avoid minimizing or ignoring unpleasant realities (e.g., oppression, prejudice, racism, sexism, etc.)³.

Cultural Awareness: The Rhode Island Social Studies Standards are intended to 1) take into account, and leverage, student cultural dimensions that impact how they acquire and demonstrate learning⁴, 2) support students in understanding the ways their identities, culture, and experiences affect, and at times limit, their perspectives, 3) allow students to learn from their peers and from perspectives beyond their scope⁵.

Instructional Engagement: The Rhode Island Social Studies Standards are intended to 1) require educators to take into account the specific contexts within which they work, and students live (demographics, political context and popular culture; urban, rural, or suburban; school, community, town, city, state, country; state of the world)⁶, and 2) drive approaches that support healthy social-emotional development. The standards do not intend to stamp out differences, but instead strive to support approaches where students can utilize their prior knowledge, culture, language, and experiences as they acquire skills and knowledge and demonstrate learning⁷.

Critical Consciousness: The Rhode Island Social Studies Standards are intended to 1) help students make sense of and critique the world around them, naming and acting upon the “norms, values, mores, and institutions that produce and maintain inequities.”⁸, 2) help build students’ abilities as citizens⁹ to recognize and move to act against bias, stereotypes, and inequities in their immediate environment, their communities, and the world around them¹⁰.

⁹Throughout this document, the term 'citizen' is not used in a strict legal sense. When used in this document, it typically refers to anyone who is an active and responsible participant in society. This civic-focused use of the word is not intended to discount the narrower use to individuals with full rights under a particular system of government. See page 26 of Educating for American Democracy: Excellence in History and Civics for All Learners report (2021) for more information about the dual meanings of “citizen” and 'citizenship.'

RHODE ISLAND'S SOCIAL STUDIES CONTENT STANDARDS

OVERVIEW

The Rhode Island Social Studies Content Standards identify the social studies content students in Rhode Island are expected to learn from kindergarten through high school. When designing instruction and teaching, teachers are also expected to keep the anchor standards front and center to inform students' exploration of and engagement with concepts and topics within the content standards.

The social studies content standards are organized by grade-level from kindergarten through eighth grade and include five courses of study for high school. Although Rhode Island's Secondary Regulations require students to take three credits of Social Studies in high school for graduation, RIDE has provided standards progressions for five high school courses in Social Studies. RIDE understands that many high schools also provide electives in Social Studies to complement the requirements. Below is an outline of the K-8 grade level topics and the five high school courses:

Kindergarten – Grade 8

- Kindergarten – Living and Working Together in Schools, Families, and Neighborhoods
- Grade 1 - Living and Working Together in Local Communities
- Grade 2 - Living and Working Together in Global Communities
- Grade 3 - Living and Working Together in the Regions of the United States
- Grade 4 - Living and Working Together in Rhode Island
- Grade 5 - United States History: Pre-European Contact to Reconstruction
- Grade 6 - Ancient to Medieval World History and Geography
- Grade 7 - Early Modern to Modern World History and Geography
- Grade 8 - Government and Civic Life in the United States and Rhode Island

High School

- Civics
- United States History I: Pre-European Contact to Reconstruction
- United States History II: Late 19th Century to the Present
- World History I: Ancient to Medieval
- World History II: Early Modern to Modern

HOW TO READ THE STANDARDS

Every grade level and high school social studies course is organized in a similar fashion. First, each course has a clear title highlighting the focus of inquiry for that course. Within each course, content is organized into inquiry topics and subtopics. For each subtopic there is a single standard with additional guidance that is designed to help teachers understand and make decisions about how to teach the provided content. To assist with this, each subtopic is presented in table form. A sample table is provided below. Following it is a brief description of each element in the table.

SAMPLE STANDARD TABLE

Each course of study for social studies follows the same format. Each course is divided into Inquiry Topics, and each inquiry topic has multiple standards. Below is a sample table used for each content standard that illustrates how the content standards within each course are displayed and organized.

Inquiry Topic 1: Families

Compelling Question: Are all families the same?

SSK.1.1 Members of and roles in families Explain families, family roles, and family rules through looking at their own, those of classmates, and those represented in literature	Connections to the Rhode Island Anchor Standards

	X	X	X		X	X					X	
Guiding Questions for Instruction: • In what ways are families unique or similar? • What are examples of family units? • What are the roles of different people in a family? • How are the roles within families similar and/or different from one another? • How do members of a family work together to help each other?	Learning Assessment Objectives: Students demonstrate an ability to: a. Identify examples and configurations of a family unit and explain the characteristics of what makes a family (e.g., adopted families, foster families, heterosexual couple families, families with same sex caregivers, interracial families, families with a single caregiver, extended families) b. Identify roles people have in a family unit and explain how the roles relate to each other c. Identify what rules and norms families have and explain who makes them and why they exist d. Explain responsibilities that members of a family have to the family unit (including to pets) e. Explain ways to help at home											

Inquiry Topic

Each grade level and high school course consists of multiple inquiry topics. Each inquiry topic is numbered, titled for easy reference, and includes a compelling question. Each inquiry topic also includes multiple content standards, each of which has its own table.

Compelling Question

Each inquiry topic includes a compelling question that is intended to provide an overarching focus of study across the topic of inquiry. Compelling questions are not designed to have simple answers and students should be able to make a range of valid evidence-based arguments in response to these questions after they have completed the topic of inquiry.

Content Standard

The box in the top left-hand corner of each table identifies the content standard. Each table has only one standard and is numbered based on the grade, topic, and standard. For example, the standard SSK.1.1 refers to *Social Studies Grade Kindergarten, Inquiry Topic 1, Standard 1*. All content standards use the four verbs emphasized in the anchor standards. In addition, in most cases the level of rigor in any content standard matches the highest level of rigor in the learning assessment objectives.

Connections to the Rhode Island Anchor Standards

Adjacent to the content standard is information that identifies which anchor standards align with and inform the content standard for the subtopic. Teachers should keep these in mind when using the content standard, guiding questions for instruction, and learning assessment objectives to design instruction and assessment tasks.

Guiding Questions for Instruction

The guiding questions for instruction provide teachers with suggested questions to help prompt student inquiry into the subtopic. They align with the learning assessment objectives.

Learning Assessment Objectives

The learning assessment objectives are designed to help teachers know what to look for when students demonstrate their learning as it relates to the content standards. These objectives also function as indicators of what effective demonstration of the standard would look like. In a sense, the objectives are an ‘unpacked’ version of the content standard. The levels of rigor in the learning assessment objectives align with those of the anchor standards and point to the anchor standards levels that students are expected to achieve.

KINDERGARTEN – LIVING AND WORKING TOGETHER IN SCHOOLS, FAMILIES, AND NEIGHBORHOODS

Students are introduced to social studies and citizenship by looking closely at their families, school, and neighborhoods. Students learn roles and rules, how people work together, and how to be good citizens in these contexts. Students also learn about the diversity of families and people represented in their school and community and gain an understanding of spatial relationships through the study of maps.
