45.00400 Social Studies/Grade 3

In third grade, students begin a three-year study of United States history in which all four strands (history, geography, civics/government, and economics) are integrated. Students learn about American Indian cultures and the exploration and colonization of North America. The geography strand emphasizes the influence of geography on early U.S. history. In the civics/government strand, students learn about the elements of our representative democracy and their rights and responsibilities as good citizens. Students will extend and apply their understanding of basic economic concepts.

▼ 45.00500 Social Studies/Grade 4

In fourth grade, students continue with year two of a three year study of United States history in which all four strands (history, geography, civics/government, and economics) are integrated. Students begin the year learning about the French and Indian War and end with the Reconstruction period. The geography strand emphasizes the influence of geography on U.S. history during these same time periods. In the civics/government strand, students learn about concepts and rights contained within our founding documents. The economic strand uses material from the history strand to deepen understanding of economic concepts.

▼ **45.00600** Social Studies/Grade 5

In fifth grade, students are in the final year of a three year study of United States history in which all four strands (history, geography, civics/government, and economics) are integrated. Students begin the year learning about the growth of 19th century industry and innovation in the United States, and culminate the study with the events and impact of September 11, 2001. The geography strand emphasizes the influence of geography on U.S. history during these same time periods. In the civics/government strand, students learn about the rights of citizens contained within the Constitution, and how changes have been made over time to the Constitution to protect the rights of citizens. In the economic strand, students explore the ways consumers and producers have interacted in the American economy.
